**NEW  
Outbound Call  
Management  
System**

**“Predictive Dialing” Has Just Become Obsolete!  
New Web-based system fully compliant with proposed FTC rules!**

## ***Virtual Instant Daytime Dialer***

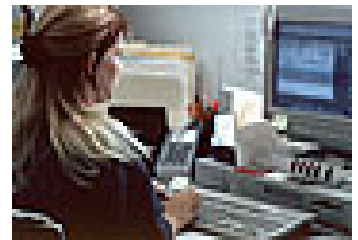

### **The Advantages**

- Realize tremendous savings the first day by avoiding hardware and software costs. No T-1s needed, because they are already installed for you.
- No need to buy predictive dialing equipment or pay for long distance costs.
- Agents speak with contacts instantly, eliminating abandoned calls and dead air.
- Usage includes outbound U.S. and Canada calls.
- Get the finest Fiber Optic quality available, (This is not VOIP!)
- Huge capacity and unlimited number of licenses available, delivering millions of messages a day.
- Convenient and easy list maintenance.
- Totally interactive features and personalization prompts greater response.
- Detailed reports.

- **No hardware needed**
- **No software needed**
- **No T1's or telecommunication infrastructure**
- **No long distance costs**
- **Includes calls to U.S. & Canada**
- **No call abandonment or dead air. Fully compliant!**

### **The System is Ready to Use Today**

Tap into one of the largest and most robust outbound calling systems available anywhere. Why go to the expense of creating your own system when the one you need is already up, operating and available to you to use now?

### **Enable Your Call Center Staff to Achieve Greater Results in Less Time**

Your callers can log in from their desktops at work, home or a remote location -- from anywhere in the world. You control everything from your web interface -- who gets called, whether you want to talk or leave a message, what message you want to leave, with or without a personal greeting, etc. Everything is at your fingertips and instantly responsive.

### **Instant Response**

Now you can continuously dial out and leave customized prerecorded messages whenever you reach voice mail. The system will also connect you directly when a live person answers the phone.

### **Store an Unlimited Number of Messages**

You can create an unlimited number of prerecorded messages to use anytime you want. Leave message #1 for one client, and message #2 for another.

### **Take Notes and View Contact History on the Fly**

Type notes in the system while you are on the call, summarizing key points for future discussions. These notes can be immediately synchronized to your existing database/CRM.

## Reduce Costs, Improve Productivity and Strengthen Relationships

Unleash the power of voice communications by tapping into the most advanced system available. Here are some of the reasons why this system can help achieve your goals:

### Add a Personal Greeting

Seamlessly place a personal greeting in front of a prerecorded message to increase the effectiveness of your calls.

### Instant Daytime Dialer Applications

You can use this amazing technology for any number of projects -- customers, members, constituents -- can all benefit from having important information quickly. Here are just a few of the popular ways this service is being used today:

- Bill collections
- Financial reporting
- Telemarketing services
- Volunteer recruitment
- Political/voter calls
- Church notifications
- Fundraising efforts
- Organization updates
- Membership announcements
- Scheduled maintenance
- Crisis communications
- School/office closings
- Directory updates
- Subscription renewals

### Virtual Instant Daytime Dialer Rates

If you are using live agents to place outbound calls, the Virtual Instant Daytime Dialer service enables you to avoid any hardware, software or telephone line or long distance charges.

Moreover, you can eliminate predictive dialer issues involving "call abandonment" and "dead air" because your agents can speak immediately with your contacts and/or leave a customized message to answering machines. The perfect solution!

**Plan #1** - \$250 per month, per user.  
First 1000 minutes free.  
15 cents per min. over 1000 min.

**Plan #2** - \$150 per month, per user.  
First 500 minutes free.  
20 cents per min, over 500 min.

**Plan #3** - \$50 per month, per user.  
39 cents per min.

Additional plans available based on more initial minutes or 50+ licenses. International cell phone usage will incur a 75 cent per min. surcharge. Inquire for rates for calls placed to numbers called outside the U.S. and Canada.

### How it Works:

The system automatically dials your clients. If they answer live, talk to them. If you get their voice mail, then just click a button and leave a prerecorded message and immediately dial out to the next client.

- Log onto your secured online account. Upload and manage your lists any way you want.
- Have the convenience of a single "click of the mouse" to dial each phone number, as often and as quickly as you want.
- Eliminate repeating the same message verbally each time you reach voice mail, saving 2 to 3 minutes per call.
- If you reach voicemail, the system will leave the message while you dial out to the next client.
